Status: 16.09.2024. All current information can be found at <https://academy-id.tuv.com/s/IDN-M17-GDP>

Companies create different types of waste. If it is not possible to prevent the creation of waste, this waste should be recycled as much as possible in accordance with the recycling economy. In this training unit, you will learn with which measures this goal can be achieved and how you can actively assist your operation with implementation.

Benefits

There are several benefits to this training on reducing environmental footprint through effective waste management and recycling in companies. Some of these benefits include:

- **Cost savings:** Implementing effective waste management and recycling strategies can result in cost savings for companies, as they can reduce disposal fees and potentially generate revenue from selling recycled materials.
- **Environmental benefits:** By reducing the amount of waste that goes to landfills and increasing recycling rates, companies can reduce their environmental impact and contribute to a more sustainable future.
- **Compliance with regulations:** Many countries have laws and regulations in place regarding waste management and recycling. By implementing effective strategies, companies can ensure they are in compliance with these regulations.
- **Improved public perception:** Consumers are increasingly aware of and concerned about the environmental impact of the companies they do business with. By implementing effective waste management and recycling strategies, companies can improve their public image and attract environmentally conscious customers.
- **Employee engagement:** Implementing sustainability initiatives, such as effective waste management and recycling, can increase employee engagement and job satisfaction by giving employees a sense of purpose and contributing to a positive company culture.

Overall, this training can help companies become more environmentally sustainable, save money, and improve their public image, while also engaging employees and meeting regulatory requirements.

Target group

The target group for this training would be professionals who are involved in waste management and sustainability efforts in companies, such as:

- Environmental managers and coordinators
- Facilities managers
- Sustainability officers
- Operations managers
- Procurement managers
- Waste management specialists
- Health and safety officers
- Engineers and technicians involved in waste management
- Sustainability consultants

The training unit would also be useful for employees who are interested in reducing their company's environmental footprint and want to learn more about effective waste management and recycling strategies.

Requirements

No Prerequisites required. Anyone can complete this course.

Training outline

Course topics for reducing environmental footprint through effective waste management and recycling in companies include:

- Introduction to waste management and recycling in companies
- Types of waste generated in companies and their environmental impact
- Benefits of effective waste management and recycling in companies
- Waste hierarchy and how to apply it in company operations
- Identifying waste reduction and recycling opportunities in companies
- Implementing waste reduction and recycling initiatives in companies
- Employee engagement and communication strategies for waste reduction and recycling
- Monitoring and measuring waste reduction and recycling success
- Compliance with waste management and recycling regulations
- Challenges and solutions for effective waste management and recycling in companies

These topics can provide a comprehensive overview of waste management and recycling in companies and equip professionals with the knowledge and tools they need to implement effective waste reduction and recycling strategies in their operations.
