Seminar Number: IDN-M8-GDP

Status: 21.11.2024. All current information can be found at <https://academy-id.tuv.com/s/IDN-M8-GDP>

In this training, you will learn about the potential risks and hazards associated with exposure to artificial optical radiation. This includes various forms of light radiation emitted by artificial sources such as lasers, ultraviolet (UV) lamps, and light-emitting diodes (LEDs). You will gain an understanding of the different types of radiation and their potential effects on the human body, such as skin damage, eye injuries, and even cancer.

You will also learn about the different safety measures that can be taken to minimize the risks associated with these hazards. Throughout the training, you will be provided with practical tips and guidelines for protecting yourself from harmful radiation in your everyday work environment.

These may include things like wearing protective eyewear, minimizing exposure time, and using appropriate shielding or barriers. By the end of this training, you will have a better understanding of the risks associated with artificial optical radiation and the steps you can take to protect yourself from harm.

## Benefits

- Increased awareness of potential hazards: By completing this training, individuals will have a better understanding of the types of artificial optical radiation that can be harmful to their health and safety.
- Improved safety practices: The training will provide practical tips and guidelines for protecting oneself from harmful radiation, such as wearing protective eyewear or minimizing exposure time. By implementing these safety practices, individuals can reduce their risk of injury or illness.
- Compliance with regulations and standards: In many industries, there are regulations and standards in place to ensure the safety of individuals who work with artificial radiation. By completing this training, individuals can ensure that they are compliant with these regulations and standards.
- Reduced risk of injury or illness: By taking steps to protect themselves from harmful radiation, individuals can significantly reduce their risk of injury or illness. This can lead to improved health outcomes and a better quality of life.

- Improved workplace culture: By promoting safety and awareness of potential hazards, this training can contribute to a positive workplace culture that values the health and safety of all employees.

## Target group

The target group for this training on artificial optical radiation and protecting oneself from harmful radiation is anyone who works in an environment where they may be exposed to such radiation. This could include individuals working in fields such as:

- Manufacturing or industrial settings that utilize lasers or other forms of artificial radiation
- Medical settings where UV lamps or other forms of radiation are used for treatment or diagnosis
- Research and development facilities that use light sources such as LEDs or lasers
- Construction sites where welding or cutting may produce harmful radiation
- Entertainment venues such as concert stages or nightclubs that utilize lighting effects
- This training can also be relevant for safety officers, health and safety professionals, or anyone else responsible for ensuring the safety of individuals in these types of environments.

## Requirements

No Prerequisites required. Anyone can complete this course.

## Training outline

- Understanding the different types of artificial optical radiation
- Recognizing the potential hazards associated with exposure to harmful radiation
- Understanding the potential health effects of harmful radiation, including skin damage, eye injuries, and cancer
- Learning about safety regulations and standards related to artificial optical radiation
- Identifying practical safety measures that can be taken to minimize exposure to harmful radiation, such as wearing protective eyewear or minimizing exposure time
- Understanding the importance of regular medical check-ups and monitoring for individuals who work with artificial radiation
- Learning about emergency response procedures in the event of an incident involving harmful radiation
- Creating a culture of safety in the workplace that values the health and safety of all employees.
- These course topics would provide a comprehensive understanding of the potential hazards associated with artificial optical radiation and the measures that can be taken to protect oneself from harm.

# Other information

For payment and other inquiries, please contact our Sales Executive:

1. Ms. Rezky Citra - (Rezky.Citra@tuv.com | +62 896-1257-3270)
2. Ms. Novia Yulianti - (Novia.Yulianti@tuv.com | +62 814-1350-3255)
3. Mr. Hendra - (Hendra.hendra@tuv.com | +62 856-2448-0758)
4. Ms. Jesseca Cindy - (Jesseca.Cindy@tuv.com | +62 812-8183-8854)

## **ADDITIONAL INFORMATION**

- Fees are inclusive of training materials and certificate.
- Training fees exclude 11% VAT.
- This e-learning will be valid for 1 months after first

## Event overview and booking

Book your desired date now directly online at <https://academy-id.tuv.com/s/IDN-M8-GDP> and benefit from these advantages:

- Fast booking process
- Personal customer account
- Simultaneous booking for several participants.

Alternatively, you can use the order form to order via fax or e-mail.

I HEREBY BINDING REGISTRATION FOR THE FOLLOWING SEMINAR:

## Artificial Optical Radiation

Seminar Number: IDN-M8-GDP

Please choose an appointment you would like to book:

- 01/01/2024 - 31/12/2099**, | Event number: IDN-M8-GDP  
Rp 175.000,00 (Net price, plus VAT) Rp 194.250,00 (Gross price, including VAT)

All further information about the dates can be found at <https://academy-id.tuv.com/s/IDN-M8-GDP>.

Please send us **all pages** of the form by fax or email to order the above seminar.

**E-mail:**  
[academy@idn.tuv.com](mailto:academy@idn.tuv.com)

**Phone:** +62 21 397 04 579

Please enter your order data on the next page.

# Order form Page 2/3

- I am ordering as a consumer (private customer)
- I am ordering as a company / public authority (business customer)

## Invoice address

We use this data for order confirmation and invoicing.

Company or authority name:

Position Title / Department (optional):

---

---

Street and house number:

ZIP CODE:

City:

---

---

Your internal purchase order number:

Your Tax VAT (optional):

---

---

You can enter an internal purchase order number  
(SAP number)

## Your contact data

We use this data for order confirmation and invoicing.

Salutation:

First Name:

Last Name:

---

---

---

Email Address:

Phone number (optional):

---

---

## Participant information

I will participate in the seminar myself (contact details as indicated above)

The following person is to participate in the seminar:

Complete only if you are not attending yourself, but another person is.

Salutation:

First Name:

Last Name:

\_\_\_\_\_

Email Address:

Phone number (optional):

\_\_\_\_\_

Date of birth (optional):

Place of birth (optional):

\_\_\_\_\_

## Payment method: Invoice

For consumers, the cancellation policy applies, which you can find under the attached terms and conditions.

I hereby accept the following general terms and conditions of the organizer (<https://academy-id.tuv.com/terms>).

Location, date

Signature
