Status: 26.09.2024. All current information can be found at <https://academy-id.tuv.com/s/IDN-P2-VC>

Enterprises and organizations nowadays are adopting proactive measures to lessen their ecological impact. The **IRCA Certified ISO 14001:2015 Environmental Management System (EMS)** stands out as a robust framework for systematically managing environmental duties.

Developed by the International Register of Certificated Auditors (IRCA), renowned globally for its leadership in [environmental management systems](#) training and certification, this framework offers a methodical approach to enhancing environmental performance. By implementing these guidelines, organizations can achieve the following:

- **Assess Environmental Impact:** Conduct thorough evaluations of environmental aspects and impacts across their operations.
- **Set Environmental Goals:** Define clear environmental objectives and formulate a strategy for sustainable advancement.
- **Implement Management Practices:** Adopt and enforce effective environmental management practices focusing on waste reduction, energy efficiency, and pollution control.
- **Monitor and Improve:** Continuously track and improve environmental performance to ensure consistent progress.
- **Ensure Compliance:** Meet or exceed relevant environmental regulations and standards.

The IRCA certification not only bolsters credibility but also demonstrates an organization's dedication to environmental best practices. Certified EMS auditors are equipped with the expertise to stringently evaluate an organization's environmental management system against ISO 14001:2015 standards, offering insights and recommendations for optimization.

Adopting an IRCA Certified ISO 14001:2015 EMS goes beyond mere compliance—it represents a commitment to cultivating an ethos of environmental responsibility. This proactive approach not only safeguards the planet but also offers operational efficiencies, cost benefits, and a stronger brand reputation, setting the stage for a sustainable future for both the organization and broader communities.

Benefits

For Individuals:

- Master the fundamentals of auditing, including the core principles, the ISO 14001:2015 standards, and the audit guidelines of ISO 19011:2018 and ISO 17021.
- Learn to meticulously plan, prepare, and conduct environmental audits.
- Acquire essential auditor skills like effective question framing, active listening, and managing communication hurdles during audits.
- Gain insights into how environmental auditing intersects with other management systems such as occupational health, safety, energy, and quality.
- Achieve an internationally recognized and IRCA accredited certification, greatly advancing your professional stature and career prospects globally.

For Organizations:

- Equip your team with the expertise to navigate and apply environmental laws at multiple levels—from local to international regulations.
- Enhance your team's capabilities in conducting thorough post-audit follow-ups and activity monitoring.
- Foster a deep understanding among your staff of how environmental management integrates with health, safety, energy, and quality systems.
- Empower your team to perform detailed audit planning and execution, significantly contributing to your organization's environmental strategy and regulatory compliance.

Target group

This IRCA Certified ISO 14001:2015 EMS Lead Auditor Training Course is meticulously crafted for a wide array of professionals dedicated to enhancing their skills in environmental management and auditing. It's perfectly suited for:

- **Environmental Managers:** Ideal for those with an academic background in environmental management (TÜV) who have a solid foundation in environmental principles.
- **Educated Professionals:** Those who have completed the EMS ISO 14001 Foundation Course or hold a similar qualification from a CQI IRCA-recognized institution.
- **Experienced Auditors and Consultants:** Existing auditors looking to focus on environmental systems or consultants keen on providing specialized advice in this field.
- **Leadership Roles:** Managers and executives charged with guiding environmental and sustainability initiatives in their companies.
- **Policy Makers:** Individuals engaged in the creation and enforcement of environmental policies and regulations.

Requirements

To enroll in the course, participants need to demonstrate their knowledge of Quality Management Systems principles and concepts. The following requirements must be met for registration:

- **Curriculum Vitae (CV):** Submit a detailed CV that highlights your relevant experience and educational background in Quality Management Systems. A form for the CV will be provided upon course registration.
- **Pre-Assessment Questionnaire:** You must complete a questionnaire to assess your foundational knowledge. This will be made available upon registration and should be submitted at least one week prior to the course start date.
- **Course Duration and Attendance:** The course runs for 5 days, totaling 40 hours. Attendance is tracked by the provider and requires the participant's signature.
- **Minimum Attendance Requirement:** You must attend at least 95% of the course to be eligible for the exam.
- **Prerequisite Certification:** Proof of attendance at an ISO 9001:2015 awareness course, supported by a training certificate or other acceptable evidence (e.g., attendance sheet), is required.

These steps ensure that all participants are well-prepared and meet the necessary criteria to benefit fully from the course.

Training outline

DAY 1

- Introduction to the course, aims and objectives, rules and continuous assessment; analysis of participants profiles with the information obtained before the beginning of the course.
- MODULE A - ESSENTIAL KNOWLEDGE
