Status: 23.11.2024. All current information can be found at <https://academy-id.tuv.com/s/IDN-F3-VC>

Blockchain technology revolutionizes information storage in a decentralized manner, without the need for a centralized authority. Simplify complex processes involving multiple parties with its open, immutable, and peer-to-peer characteristics. The course material includes an introduction to blockchain technology and its potential uses.

You'll gain the knowledge and skills necessary to become a certified blockchain solutions consultant, and through our program, covering the principles of secure asset transfers, such as money, property, and contracts, without intermediaries like banks or governments.

The program deliver with theoretical learning and hands-on practice, followed by certification test. Basic knowledge of blockchain, computer science, or relevant business domains is recommended. Designed for both technical and non-technical learners, this program offers a comprehensive understanding of blockchain and its applications. Become a certified blockchain technology consultant and navigate secure asset transfers confidently.
