Status: 13.11.2024. All current information can be found at https://academy-ph.tuv.com/s/PH-C11-GDS_msyn_v01_u01_en

Energy management helps organizations improve their energy efficiency by establishing the necessary systems and processes. The goal is to reduce energy consumption and, where possible, energy costs, as well as greenhouse gas emissions and other environmental impacts associated with energy use. In addition to basic definitions, this introductory unit explains why energy management has become a critical operational and strategic issue for almost every organization today.

Benefits

- Introduction to energy management
- Evolution of energy management systems
- Considerations on energy relevance
- Why energy management?

Target group

All groups of people who wish to obtain basic information on the standardization of management systems

Requirements

None

Training outline

Introduction to energy management
Evolution of energy management systems
Considerations on energy relevance
Why energy management?
