Seminarnummer: 26751 | Herstellernummer: VM-AWEMIDOPS

Stand: 21.02.2026. Alle aktuellen Informationen finden Sie unter https://akademie.tuv.com/s/26751

Dieser eintägige Kurs vermittelt Ihnen die Fähigkeiten, einen VMware AirWatch-Server vor Ort zu installieren, zu konfigurieren und zu aktualisieren.

Nutzen

This one-day course is designed to equip students with the skills needed to install, configure, and upgrade an on premise AirWatch server. Students will have access to hands-on labs and learn upgrade options and strategies, as well as how to troubleshoot common installation and upgrade issues. Advanced installation techniques are discussed, including the use of high availability and redundancy.

By the end of the course, you should be able to meet the following objectives:

- Identify important installation and upgrade prerequisites
- Learn to install, configure and upgrade an On-Premise AirWatch server
- Discuss the benefits of utilizing advanced installation techniques, including the use of high availability and enabling redundancy through multi-server configurations
- Review and recommend appropriate upgrade options and strategies
- Troubleshoot common installation and upgrade issues

Zielgruppe

Airwatch Administrators, IT Staff, Sales Engineers, Consultants, Support or Helpdesk, Solutions Architects, Solutions Engineers, Airwatch Installers or Implementation Specialists

Voraussetzungen

This course requires completion of the following course:
- AirWatch Enterprise Mobility: Configure and Deploy Integrated Solutions
