Version: 08.05.2024. Vous trouverez toutes les informations actuelles sur <https://academie-fr.tuv.com/s/FR-SE51>

In accordance with the EU REACH Regulation, the European Commission has adopted a training obligation for all users on the handling of diisocyanates. This includes users who use diisocyanates for industrial and commercial purposes or monitor related tasks. Training is intended to ensure safe handling of diisocyanates.

Les objectifs

- You will receive training on the safe use of diisocyanates.
- With this training you will meet the requirements of the REACH regulation.
- They stay up to date.

Le public ciblé

For persons who use diisocyanates for industrial and commercial purposes or supervise related tasks.

Les prérequis

Person who use diisocyanates for industrial.

Le contenu de la formation

Basic training on diisocyanates:

- Definition and chemistry of diisocyanates
- Product labels and safety data sheets
- Operating instructions
- Dangers of handling diisocyanates
- Exposition
- Sensitisation
- Personal protective equipment
- Hygiene
- Risks and applications
- Behavior and safety
- Emergency measures
- Change Management
- Disposal of packaging
- Safety precaution
- National regulations and codes

Specific topics on diisocyanates in printers:

- Risks related to the application: general risks, color cuisine, printing press, cleaning
- Disposal of waste
- Emergency measures
- Decontamination of empty drums and IBCs
- Personal protective equipment
- Safe behavior
- Case studies
- Cleaning and maintenance
- Change Management
- What to do in an emergency

Attendance

After passing the exam, you will receive a certificate from the TÜV Rheinland Academy as proof of your expertise to the employer and the authorities.

Informations importantes

Important notes !

- To select the right Diisocyanate training module (e-learning), we recommend that you consult with your diisocyanate safety expert in advance.
- With this module you fulfill the training obligation according to the REACH regulation.
- The training must be completed every five years and must have been completed for the first time by August 24, 2023.
- You can also qualify as a "Safety Expert for Diisocyanates (TÜV)" and thus receive the qualification to independently conduct training on the safe handling of diisocyanates (seminar no. 05090).
- This module has been developed jointly with ISOPA and ALIPA.

If you have a disability, please contact us before registering by sending an email to formation@fr.tuv.com. We will do our best to accommodate your training needs.
