Auditing the **Indonesian Sustainable Palm Oil (ISPO)** system is the subject of this training. You will acquire the skills necessary to efficiently arrange and execute audits, checking for adherence to environmental regulations.

Following Government Regulation No.44 of 2020 and Ministry of Agriculture Regulation No.38 of 2020, oil palm plantation businesses are required to obtain ISPO certification and will face administrative sanctions from the Minister if they fail to fulfill their ISPO certification obligations. In response to this, plantation business operators are preparing to meet these obligations by providing education and awareness to management and workers on ISPO certification standards and systems, as well as the benefits and impacts of ISPO certification.

Additionally, plantation companies are required to have an Internal Auditor who understands the principles and criteria of ISPO obtained through ISPO training as required by Article 10 of Ministry of Agriculture Regulation No.38 of 2020. TÜV Rheinland Indonesia provides ISPO training for internal staff and the general public.
