Seminar Number: PH-AI-PECB-ISO-IEC-42001-Foundation-eLearning

Status: 16.03.2026. All current information can be found at <https://academy-ph.tuv.com/s/PH-AI-PECB-ISO-IEC-42001-Foundation-eLearning>

The **ISO/IEC 42001 Foundation** course is an entry-level training designed to help professionals understand the core principles of Artificial Intelligence Management Systems (AIMS). Over two days, this course provides a solid grounding in the structure, requirements, and purpose of ISO/IEC 42001—the first international standard for managing AI responsibly. It walks you through how organizations can align AI technologies with ethical practices, legal obligations, and organizational objectives. This course is suited for individuals seeking clarity on what AI governance involves and how to apply the standard in real-world contexts.

Participants will develop core competencies required to contribute to or support the implementation of an AIMS. These competencies include:

- Understanding the **purpose and scope** of ISO/IEC 42001 as it relates to responsible AI.
- Interpreting the **key requirements** of an AI management system and how they apply to organizations.
- Recognizing the **risks, controls, and best practices** in AI operations, from data to decision-making.
- Gaining familiarity with how to support **ongoing monitoring, audits, and improvement** within an AIMS.

## Benefits

### **For professionals**

Taking this course will help you:

- Understand the foundations of AI governance and how AI systems are managed in a structured, ethical way.
- Build confidence in interpreting and applying ISO 42001 principles across industries or roles.

- Prepare for the **PECB Certificate Holder in ISO/IEC 42001 Foundation** credential to strengthen your CV.
- Gain exposure to global AI best practices relevant to your current or future responsibilities.
- Start a pathway toward more advanced ISO 42001 certifications, such as Implementer or Auditor levels.

### **For organizations**

Having team members complete this course will help your organization:

- Build internal awareness of AI risks, governance, and compliance requirements.
- Establish a foundation for implementing an Artificial Intelligence Management System aligned with ISO 42001.
- Demonstrate commitment to ethical and responsible AI in your internal processes and public messaging.
- Strengthen preparation for future ISO 42001 certification, audits, or regulatory alignment.
- Foster a common language and understanding around AI risks, performance, and policy.

## Target group

This course is ideal for individuals at the early stages of AI governance responsibilities or ISO 42001 exposure. If you fall into any of the categories below, this training is for you:

- Professionals seeking to understand AI management system requirements.
- Managers, analysts, or consultants working with AI-related functions.
- Members of internal teams supporting risk, compliance, or digital innovation.
- Project stakeholders participating in AI or emerging technology initiatives.
- Anyone interested in contributing to or supporting an AI governance framework.

Clear audience alignment ensures you're learning what's relevant to your role or aspirations.

## Requirements

There are no formal prerequisites to join this course. It is open to anyone looking to understand AI governance and ISO 42001. Still, having a general awareness of AI or management systems may help you get more out of the training. Specifically:

- No prior experience in ISO standards or artificial intelligence is required.
- Familiarity with AI, data systems, or compliance topics is helpful but not necessary.
- Ideal for beginners who want to build a strong foundation before moving to more advanced ISO 42001 roles.

These flexible entry conditions make the course accessible to a wide range of learners.

## Training outline

This foundational course covers:

- Introduction to AI Management Systems and ISO/IEC 42001
- Core components of an AIMS: context, policy, planning, and support
- Overview of risk-based thinking and compliance requirements
- Essentials of internal audits, performance evaluation, and continual improvement
- Practical methods for managing and improving AIMS
- The training includes theoretical concepts, real-world examples, and self-assessment quizzes aligned with the certification exam format.

## Other information

The training includes full certification support, high-quality materials, and flexible delivery. Here's what you can expect:

- **Duration:** 2 days (typically 14 CPD hours).
- **Certification:** Includes one exam attempt for the *PECB Certificate Holder in ISO/IEC 42001 Foundation*.
- **Exam Format:** 1-hour proctored, scenario-based online exam.
- **Course Materials:** Access to over 200 pages of structured content, exercises, and examples.
- **Training Format Options:** Instructor-led classroom, live online, or self-study.
- **Retake Policy:** One free retake permitted within 12 months if needed.
- **Proof of Attendance:** Attestation and CPD credits issued upon course completion.

Every element of this course is designed to support your success, whether you're building personal capabilities or contributing to a wider AI strategy.
