Status: 16.03.2026. All current information can be found at <https://academy-ph.tuv.com/s/PH-AI-PECB-ISO-42001-Lead-Implementer-eLearning>

The **ISO/IEC 42001 Lead Implementer** course is a comprehensive five-day training that prepares professionals to design, implement, manage, and improve an Artificial Intelligence Management System (AIMS) in accordance with ISO/IEC 42001. This course is built for those who play a critical role in operationalizing AI governance within an organization. It combines theoretical foundations with hands-on guidance to equip learners with the tools needed to turn ISO 42001 requirements into practical, scalable processes.

Participants will gain key competencies that directly apply to real-world AIMS implementation. These include:

- Understanding the structure, objectives, and principles of ISO/IEC 42001.
- Planning and executing an AIMS implementation project using structured methodologies.
- Integrating ISO 42001 requirements into existing organizational processes and governance frameworks.
- Supporting operational control, performance measurement, and continual improvement of AI systems.
- Preparing organizations for external certification audits and ensuring audit-readiness.

Together, these competencies enable professionals to lead responsible, standards-aligned AI adoption.

Benefits

For professionals

This training allows professionals to:

- Build deep expertise in ISO 42001 implementation and AI governance structures.

- Earn the *PECB Certified ISO/IEC 42001 Lead Implementer* credential to demonstrate their qualifications.
- Gain practical skills that support career advancement in AI compliance, digital transformation, or risk management.
- Learn to align AI projects with international standards, ensuring responsible use of technology.
- Prepare for future roles in AI program leadership or advisory functions.

For organizations

Organizations benefit from having trained Lead Implementers by being able to:

- Develop a structured, standard-aligned framework for managing AI risks and responsibilities.
- Improve internal capacity to implement AI governance without over-reliance on external consultants.
- Reduce regulatory and reputational risks associated with AI misuse or noncompliance.
- Build credibility and stakeholder trust through structured and auditable AI management practices.
- Streamline readiness for ISO 42001 certification and future AI-related regulations.

Target group

This course is intended for professionals responsible for leading or supporting the rollout of AI governance systems. It is suitable for:

- AI project managers, solution architects, and team leads.
- Compliance officers and risk managers in organizations using or adopting AI.
- Consultants and advisors involved in ISO management system implementation.
- Governance professionals and innovation officers focused on AI oversight.
- Anyone involved in strategic planning or operational integration of AI systems.

If your role includes implementing new systems or leading AI adoption, this training provides the structure you need.

Requirements

To get the most value from this course, participants are expected to have some familiarity with ISO systems and AI concepts. Specifically:

- A general knowledge of ISO/IEC 42001 is recommended.
- Prior experience with ISO management systems (such as ISO 27001 or ISO 9001) is helpful.

- Completion of the ISO 42001 Foundation course is advisable but not mandatory.
- An understanding of basic AI principles and risks will support learning.

These prerequisites ensure that the training builds on a foundational understanding and moves into advanced, applied implementation.

Upon completion of the course and exam, you may apply for the official PECB ISO/IEC 42001 Lead Implementer certification to validate your implementation skills.

Training outline

This course includes practical modules covering:

- Foundations and principles of AIMS and ISO/IEC 42001
- Frameworks and strategies for AIMS implementation
- Application of PECB's IMS2 Methodology and industry best practices
- Monitoring, maintenance, and continuous improvement of AIMS
- Certification readiness and audit preparation

Interactive exercises, real-world examples, and scenario-based quizzes help you translate knowledge into action.

Other information

The ISO 42001 Lead Implementer training includes full certification support and is delivered in flexible formats. Here's what's included:

- **Duration:** 5 days of instructor-led training.
- **Certification:** *PECB Certified ISO/IEC 42001 Lead Implementer* credential upon passing the exam.
- **Exam:** 3-hour proctored certification exam on Day 5.
- **Certification Path:** Progress through Provisional Implementer, Implementer, Lead, or Senior Lead levels depending on experience.
- **Materials:** Access to 400+ pages of professional training content, case studies, and templates.
- **CPD:** Earn 31 Continuing Professional Development (CPD) credits.
- **Retake Policy:** One free exam retake available within 12 months.
- **Delivery Modes:** Classroom, online live sessions, or self-study formats available.

All tools and resources are provided to help you succeed—whether you're leading transformation in a startup or scaling AI in a multinational.

Event overview and booking
