Status: 11.02.2025. All current information can be found at https://academy-ph.tuv.com/s/PH-C11-GDS_hvsa_v01_u04_en

In this training unit, you will learn important information about how to work safely on the high voltage electrical system of a vehicle. We will use the tried-and-tested "Five Safety Rules" as a guide, which are familiar to every electrician and can be easily applied to work on electric and hybrid vehicles. Emphasis will be placed on systematically shutting down the electrical system and verifying that it is truly de-energized.

Benefits

At the end of the e-learning session, the participants should be able to learn the following areas:

- Disconnect completely
- Secure against reconnection
- Verify the non-live state
- Grounding and short-circuiting
- Protection against adjacent live parts
- Assume responsibility for others
- Recommissioning after completion of work

Target group

Employees of car dealerships
Fleet managers
Automotive mechanics and service technicians

Automotive Sales Representatives
Interested parties from related industries
