Seminarnummer: 29346 | Herstellernummer: MOC20696

Stand: 06.05.2024. Alle aktuellen Informationen finden Sie unter <https://akademie.tuv.com/s/29346>

In this five-day course, you will learn typical management tasks, including how to maintain software, client health, and integration with Intune. Along with Microsoft Official Course 20695C, this course helps certification candidates prepare for Exam 70-696: Managing Enterprise Devices and Apps. Meet your goals with our course!

Nutzen

In this five-day course, you will learn day-to-day management tasks, including how to manage software, client health, hardware and software inventory, applications, and integration with Intune. You also will learn how to optimize System Center Endpoint Protection, manage compliance, and create management queries and reports. Additionally, this course, in conjunction with Microsoft Official Course 20695C, also helps certification candidates prepare for Exam 70-696: Managing Enterprise Devices and Apps.

Für dieses Seminar bieten wir den Nachfolger Administering System Center Configuration Manager (MOC20703-1) mit der Seminarnummer 29467 an. Hier hat Microsoft die Inhalte wesentlich aktualisiert.

Zielgruppe

This course is for experienced information technology (IT) professionals, typically described as Enterprise Desktop Administrators (EDAs). EDAs deploy, manage, and maintain PCs, devices, and applications across medium, large, and enterprise organizations. A significant portion of this audience uses, or intends to use, the latest release of Configuration Manager and Intune to manage and deploy PCs, devices, and applications. By using Configuration Manager with Intune, EDAs also can support either domain-joined or non-domain-joined Bring Your Own Device (BYOD) scenarios, mobile-device management, and secure data access on common operating-system platforms, such as Windows, Windows Phone, Apple iOS, and

Android. This course also is for individuals who are interested in taking exam 70-696: Managing Enterprise Devices and Apps.

Voraussetzungen

In addition to their professional experience, students who attend this training should already have system administrator–level working knowledge of:

- Networking fundamentals, including common networking protocols, topologies, hardware, media, routing, switching and addressing.
- Active Directory Domain Services (AD DS) principles, and fundamentals of AD DS management.
- Installation, configuration, and troubleshooting for Windows-based personal computers.
- Basic concepts of public key infrastructure (PKI) security.
- Basic concepts of scripting and Windows PowerShell syntax.
- Basic concepts of Windows Server roles and services.

Inhalte des Seminars

After completing this course, students will be able to:

- Describe the features Configuration Manager and Intune include, and explain how you can use these features to manage PCs and mobile devices in an enterprise environment.
- Prepare a management infrastructure, including configuring boundaries, boundary groups, and resource discovery, and integrating mobile-device management with Microsoft Exchange Server.
- Deploy and manage the Configuration Manager client.
- Configure, manage, and monitor hardware and software inventory, and use Asset Intelligence and software metering.
- Identify and configure the most appropriate method to distribute and manage content used for deployments.
- Distribute, deploy, and monitor applications for managed users and systems.
- Maintain software updates for PCs that Configuration Manager manages.

- Use Configuration Manager to implement Endpoint Protection.
- Manage configuration items, baselines, and profiles to assess and configure compliance settings and data access for users and devices.
- Configure an operating-system deployment strategy by using Configuration Manager.
- Manage mobile devices by using Configuration Manager and Intune.
- Manage and maintain a Configuration Manager site.

Wichtige Hinweise

Dieses Seminar ersetzt den MOC10747 "Administering System Center 2012 Configuration Manager".

Für dieses Seminar bieten wir den Nachfolger Administering System Center Configuration Manager (MOC20703-1) mit der Seminarnummer 29467 an. Hier hat Microsoft die Inhalte wesentlich aktualisiert.
