Seminarnummer: 26748 | Herstellernummer: VM-HICMV7_OD

Stand: 29.04.2024. Alle aktuellen Informationen finden Sie unter <https://akademie.tuv.com/s/26748>

This course gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.

Nutzen

This course gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. This course builds your skills in installing, configuring, and managing VMware Horizon® 7 through a combination of lecture and hands-on labs. You will learn how to configure and deploy pools of virtual machines, how to manage access and security of the machines, and how to provide a customized desktop environment to end users.

Product Alignment

- VMware Horizon 7

This course is also available in an ILT format. (Veranst Nr. 26704)

Zielgruppe

Technical personnel who work in the IT departments of end-customer companies and people who are responsible for the delivery of remote or virtual desktop services

Voraussetzungen

Customers attending this course should have at a minimum the following VMware infrastructure skills:

- Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
- Open a virtual machine console on VMware vCenter Server® and access the guest operating system

- Create snapshots of virtual machines
- Configure guest customization specifications
- Modify virtual machine properties
- Convert a virtual machine into a template
- Deploy a virtual machine from a template

Attendees should have at a minimum the following Microsoft Windows system administration experience:

- Configure Active Directory services, including DNS, DHCP, and time synchronization
- Restrict users activities by implementing Group Policy objects
- Configure Windows systems to allow Remote Desktop Connections
- Build an ODBC connection to an SQL Server database
