Stand: 21.09.2024. Alle aktuellen Informationen finden Sie unter <https://akademie.tuv.com/s/27520>

This is an original ORACLE Training on Demand online product.

Nutzen

This Oracle Session Border Controller (SBC) Configuration and Administration training course is designed for enterprise or service provider network professionals involved in SIP session delivery and control. Although the course describes all currently available hardware platforms, all the concepts and operations are presented in a platform independent way. In a similar manner, the course is software-release independent as well.

Enrolling in this course will help you develop a deeper understanding of the fundamentals of Session Initiation Protocol (SIP) as well as system and protocol-specific configuration of the SBC. The contents addressed apply equally to both service provider and enterprise deployments. You'll walk away with more knowledge of SBC architecture, concepts and administration in the form of configuration management (backups, restores and revision control) by participating in hands-on labs.

Zielgruppe

Netzwerkadministratoren
Projektmanager

Voraussetzungen

Erforderliche Vorkenntnisse:

- Familiarity with computer communication systems and concepts

- Familiarity with commonly used data communication protocols
- Basic understanding of telephony systems

Empfohlene Vorkenntnisse:

- TCP/IP Networking
- VoIP Telephony

Inhalte des Seminars

- Hardware Platforms
- Session Initiation Protocol (SIP) Essentials
- Introduction to Session Border Controllers
- Initial configuration
- Provisioning interfaces
- Session Border Controller concepts
- Peering environment configuration
- Access-backbone environment configuration
- Transcoding configuration
- Configuring High Availability
