

Microsoft 365 Messaging, Exchange Online Administration (MS-203)

Microsoft 365 Messaging, Exchange Online Administration (MS-203)

 Seminar

 20 Termine verfügbar

 Teilnahmebescheinigung

 Präsenz / Virtual Classroom

 40 Unterrichtseinheiten

 Garantietermine vorhanden

Seminarnummer: 29517 | Herstellernummer: MOC-MS-203

Stand: 27.05.2023. Alle aktuellen Informationen finden Sie unter <https://akademie.tuv.com/s/29517>

Dieser Kurs behandelt die Kernelemente der Microsoft 365 Messaging-Verwaltung, einschließlich Nachrichtentransport und Mail-Fluss, Messaging-Sicherheit, Regeln und Compliance, Messaging-Infrastruktur und hybrides Messaging. Dieser Kurs richtet sich an IT-Experten, die die Messaging-Infrastruktur für Microsoft 365 auf Basis von Exchange Online in ihrem Unternehmen bereitstellen und verwalten.

Nutzen

Nach Besuch diese Messaging-Seminars sind Sie in diesen Themen geschult:

- Konfigurieren und Verwalten der Transportpipeline
- Verwaltung und Fehlerbehebung bei EMail-Fluss und Transportproblemen
- Verwaltung von Nachrichten"regeln" und Compliance
- Verwalten der Authentifizierung für Messaging
- Konfigurieren von organisatorischen Einstellungen und Freigabe
- Verwalten von mobilen Geräten
- Verwalten rollenbasierter Berechtigungen
- Erstellen und Verwalten von Empfängerobjekten und -ressourcen
- Planung, Implementierung und Fehlerbehebung für öffentliche Ordner
- Planen Sie eine hybride Umgebung
- Durchführen von Mailbox-Migrationen
- Einsatz und Fehlerbehebung in einer hybriden Umgebung

Das Seminar bereitet auf das Examen MS-203 vor.

Zielgruppe

Der Messaging-Administrator und Consultant verteilt, konfiguriert und verwaltet Empfänger, Berechtigungen, Mail-Schutz, Mail-Fluss und öffentliche Ordner sowohl in lokalen als auch in Cloud-Umgebungen von

Unternehmen und bietet Fehlerbehebung an. Zu seinen Aufgaben gehören die Verwaltung der Nachrichtenregeln, der Messaging-Infrastruktur sowie der hybriden Konfiguration und Migration. Um eine sichere hybride Topologie zu implementieren, die den Geschäftsanforderungen eines modernen Unternehmens entspricht, muss der Messaging-Administrator mit dem Sicherheitsadministrator und dem Microsoft 365 Enterprise Administrator zusammenarbeiten.

Voraussetzungen

Der Messaging-Administrator sollte über praktische Kenntnisse der Authentifizierungsarten, Lizenzierung und Integration mit Microsoft 365-Anwendungen verfügen. Erfahrungen mit Exchange 201x und Office365 Infrastrukturen sind hilfreich.

Inhalte des Seminars

Module 1: Managing the Transport Pipeline

In this module, you will learn about the different transport components of Exchange, how the message routing works, and how to configure the message flow for your organization. You will examine the tasks that messaging administrators must complete to configure message transport. You will review the message transport options and learn how to configure domains and connectors and how to implement an approval workflow for messaging. You will also learn how to manage transport rules, which are a very powerful configuration to control the message flow in your organization.

- Overview of Transport Services
- Configuring Message Transport
- Managing Transport Rules

Module 2: Managing and Troubleshooting Mail Flow

In this module, you will examine the components of mail flow, and you will learn how to manage your mail flow, which is a crucial task for every Exchange administrator. You will study the differences between managing mail flow in Exchange Online, Exchange Server, and Exchange Hybrid deployments. From managing mail flow, you will transition to troubleshooting mail flow issues such as emails not being routed correctly in or outside your organization, or when secure connections cannot be established successfully. You will learn about the tools Microsoft provides to help you find the root cause of your issues and fix your mail flow. You will then transition

from troubleshooting mail flow to troubleshooting transport issues, such as network-based issues, connector and agent issues, and architectural issues, as well as how to troubleshoot in coexistence. Finally, you will learn how to check event, protocol, and tracking logs when all troubleshooting for service availability and message transport has finished and an issue still persists, or if you must find historical data about issues in the past.

- Managing Mail Flow
- Troubleshooting Mail Flow
- Troubleshooting Transport Issues
- Troubleshooting with Logs

Module 3: Managing Message Hygiene

In this module, you will learn about Microsoft Exchange Online Protection (EOP) features and functionality. You will also learn how to plan messaging routing for this service, which provides anti-malware and anti-spam policies that protect your organization against spam and malware and safeguards your organization from messaging-policy violations. You will then review the anti-malware and anti-spam protection that Exchange Server and Online Protection provide, and you will learn how to configure SPAM and malware filters, policies, and settings to provide protection for your users. You will conclude the module by examining Advanced Threat Protection (ATP) and how it extends the protection provided by EOP by filtering targeted attacks that could pass through EOPs line of defenses, including advanced threats such as zero-day attacks in email attachments and Office documents and time-of-click protection against malicious URLs. You will learn how Microsoft 365 ATP protects users from advanced threats through features such as safe attachments and safe links, and how it generates reports which provide administrators with insight into attacks targeting their tenants through email.

- Planning for Message Hygiene
- Managing Anti-Malware and Anti-Spam Policies
- Managing Advanced Threat Protection

Module 4: Managing Compliance

This module begins by describing the different compliance features in the Security & Compliance Center (SCC) that messaging administrators can use to comply with legal and regulatory requirements. This module supports compliance in Exchange by examining the compliance features available in the Exchange Admin Center for Exchange Server and hybrid deployments. Because of the complex retention requirements of modern messaging environments, this module focuses on how archiving is performed with Exchange so that you can provide an efficient and compliant environment to your users. You will also examine how additional archive storage is provided to your users, how messages are automatically processed and archived, and how audit logging in Exchange that provides information about administrator, delegate, and user actions in user mailboxes and your Exchange organization. Finally, because organizations must adhere to legal discovery requirements (related to organizational policy, compliance, or lawsuits), you will examine how eDiscovery for Microsoft Exchange can help you perform discovery searches for relevant content within mailboxes.

- Messaging Compliance in the SCC
- Messaging Compliance in Exchange

- Managing Exchange Online Archiving and Auditing
- Managing Content Search

Module 5: Managing Organizational Settings

This module begins with an examination on how to manage authentication for messaging. This module focuses on how to ensure that user accounts are well protected and secure, and how to deploy multiple security features that do not introduce unnecessary complexity in users everyday work, which can result in lower business productivity and new security risks. You will then transition from messaging authentication to organizational settings, where you will learn how to configure settings that apply to the entire organization or to many users in the organization. Finally, you will examine how to configure organizational sharing.

- Managing Authentication for Messaging
- Configuring Organizational Settings
- Configuring Organizational Sharing

Module 6: Managing Mobile Devices

This module, you will begin by examining Mobile Device Management in Microsoft 365, as well as how Exchange ActiveSync and mobile device mailbox policies support this effort. You will then examine how to manage and troubleshoot mobile device access. This module then examines how to configure both access and infrastructure for mobile devices, understanding the implications of mobile device remote wipe, and learning about alternative methods for mobile device management.

- Mobile Device Mailbox Policies
- Managing Mobile Device Access

Module 7: Managing Role-Based Permissions

This module examines how messaging administrators manage role-based permissions, which is an essential task for any messaging administrator. Since Exchange Server and Exchange Online both use the Role Based Access Control (RBAC) permission model, this module examines the basics of RBAC management. The module concludes by examining how a messaging administrator must plan and configure permissions carefully so as not to put their environment or their entire Active Directory at risk.

- Managing Admin Roles
- Managing User Roles
- Exchange Setup - RBAC and AD Split Permission

Module 8: Managing Recipient Objects and Resources

This module examines some of the most common tasks that messaging administrators perform - creating and

configuring email recipients, lists, and resources. This module examines the different types of Exchange Server recipients, including how they differ from each other. The module then focuses on the various tasks that require you to create and manage Exchange recipients in Exchange, including user mailboxes, resource mailboxes, shared mailboxes, mail contacts, and mail users. You will also learn how to manage permissions for recipients, and how to create and manage groups.

- Exchange Recipients
- Creating and Managing Exchange Recipients
- Managing Email Addresses, Lists, and Resources

Module 9: Managing Public Folders

In this module, you will learn about public folders in Exchange, review the planning considerations for deploying public folders, and discuss alternatives to public folders. You will also learn how to implement and manage public folder mailboxes, public folders, and public folder permissions, as well as how to create and manage mail-enabled public folders. The module concludes by examining how to monitor and troubleshoot Public Folder-related issues.

- Planning the Public Folder Hierarchy
- Implementing and Managing Public Folders
- Troubleshooting Public Folders

Module 10: Planning a Hybrid Environment

In this module you will examine the requirements necessary to implement a hybrid deployment, and you will learn about the features and components that are required when implementing a hybrid deployment. This module examines all planning aspects that are required before running the Hybrid Configuration Wizard. This includes the configuration options of the HCW, as well as the details on Organization Configuration Transfer (OCT) and the Hybrid Agent. The module concludes with a review of the mail flow options for a hybrid deployment.

- Exchange Hybrid Deployment Requirements
- Planning to Run the Hybrid Configuration Wizard

Module 11: Performing Mailbox Migrations

This module examines the options that are available for migrating email to Exchange Online, such as performing a migration or using FastTrack to move mailboxes from your existing mail servers to Exchange Online. This module summarizes the migration and co-existence options and recommends when to use which option. The module then examines the requirements for running an IMAP migration, the migration options that are available, and the steps that are performed during a migration. The module then examines how to plan and perform both a cutover and staged migration. It compares each of these two migration approaches, and you will learn about the requirements, planning activities, and migration process for each option. The module concludes by examining important additional migration tasks, such as migrating a PST file and the

considerations for a Public Folder migration.

- Planning Mailbox Migrations
- Performing IMAP Migrations
- Performing Cutover and Staged Migrations
- Performing Advanced Migrations

Module 12: Deploying and Troubleshooting a Hybrid Environment

In this module, you will learn the key areas to plan for regarding Edge Transport servers. You will then learn about the requirements and best practices to configure a hybrid deployment, which is the first step for your Exchange organization, regardless of whether you want to connect your Exchange on-premises and Exchange Online organizations for long-term coexistence or as part of a cloud migration strategy. You will then examine how to manage a hybrid deployment and implement advanced hybrid functionality. You will cover the features that require a successful hybrid deployment such as Public Folder coexistence or OneDrive for Business attachment storage for on-premises mailboxes. This module concludes with an introduction to troubleshooting techniques for a hybrid deployment. You will learn how to troubleshoot directory synchronization issues including pass-through authentication (PTA) and single sign-on, Exchange transport, and client access troubleshooting as well as mailbox replication service troubleshooting.

- Deploying and Managing an Edge Transport Server
- Configuring a Hybrid Deployment using the HCW
- Implementing Advanced Hybrid Functionality
- Troubleshooting Hybrid Deployments

Wichtige Hinweise

Die Seminar ersetzt die Exchange Online / Microsoft 365 Kurse MS-200 und MS-201 und bereitet auch für das Examen MS-203 zum Microsoft 365 Certified: Messaging Administrator Associate vor. Die Examen MS-200 u. MS-201 sind ab 1.9.2020 nicht mehr verfügbar.

jetzt Ihre Prüfung MS-203 über die Nr. 29799 direkt mitbuchen!

Terminübersicht und Buchung

Buchen Sie Ihren Wunschtermin jetzt direkt online unter <https://akademie.tuv.com/s/29517> und profitieren Sie von diesen Vorteilen:

- Schneller Buchungsvorgang
- Persönliches Kundenkonto
- Gleichzeitige Buchung für mehrere Teilnehmer/innen.

Alternativ können Sie das Bestellformular verwenden, um via Fax oder E-Mail zu bestellen.
