This is an original ORACLE Training on Demand online product.

Nutzen

The Oracle Solaris 11 System Administration training covers the full range of introductory system administration tasks on Oracle Solaris 11.3 OS. The topics covered range from installing the operating system on a single system, to monitoring and basic troubleshooting. The Oracle Solaris 11 System Administration course is designed to provide new system administrators, as well as enterprise system administrators who are new to the Oracle Solaris 11 Operating System, with the skills they need to perform their job tasks successfully and efficiently.

Learn To:

- Perform software installation and software package updates.
- Manage services, processes and access controls.
- Administer data storage, zones, network and users.

Zielgruppe

Systemadministrators

Voraussetzungen
