Stand: 29.03.2024. Alle aktuellen Informationen finden Sie unter <https://akademie.tuv.com/s/27159>

This Oracle Solaris 11 Advanced System Administration training provides an intensive hands-on experience on Oracle Solaris 11.3 operating system.

Nutzen

You'll learn complex and integrated administration concepts through a combination of lessons and hands-on exercises that will reinforce your learning. Also, this course will introduce you to Oracle Solaris 11 on the Cloud.

This is an advanced course which dives into the details of configuring and administering an Oracle Solaris 11 system.

Learn To:

- Install Oracle Solaris 11 using the Automated Installer (AI).
- Use the Image Packaging System (IPS) for package management.
- Configure zones and virtual networks.
- Configure IP multipathing.
- Secure the system through the use of privileges and auditing.
- Manage processes and evaluate system resources.
- Discover tools needed to effectively and efficiently troubleshoot software failures.

Zielgruppe

One year experience as an associate Oracle Solaris 11 system administrator Oracle Solaris 11 System

Voraussetzungen

One year experience as an associate Oracle Solaris 11 system administrator

Students without Oracle Solaris 11 system administration experience should take the Oracle Solaris 11 System Administration course first to ensure an effective knowledge of Oracle Solaris 11 system administration before attempting to take this advanced course. Those with Oracle Solaris 10 experience should take the Transition to Oracle Solaris 11 course as it builds on your Oracle Solaris 10 knowledge and provides training more tailored to your background.
